PROFESSIONAL SUMMARY

I'm an enthusiastic IT student and aspiring Web3 developer who loves building creative and practical digital solutions. I have hands-on experience in full-stack development, blockchain, and cybersecurity, and enjoy creating smart contracts, dApps, and responsive web apps. I've led teams in multiple hackathons, including **ETHGlobal Hackathon**, **Smart India Hackathon**, **BNB Hackathon**, and **Avalanche Hackathon**, and I'm passionate about combining my technical skills with design to make projects that really stand out.

CORE SKILLS

- ✓ HTML
- ✓ React
- ✓ Solidity
- ✓ Javascript
- ✓ Tailwind - Bootstrap5
- ✓ Cyber Security
- ✓ Anime.js
- ✓ C++
- ✓ Python
- ✓ CSS
- ✓ Nextjs
- ✓ Figma
- ✓ AI Tools (Prompt Engineering)
- ✓ TypeScript
- ✓ Git - Github
- ✓ Three.js
- ✓ C
- ✓ Java

Project

ETHGlobal Hackathon Project - AI DeFi Trading Agent

Created an AI-powered trading dApp with natural language processing for automated token swaps, wallet management, and real-time DeFi integration.

Tech: React, TypeScript, Gemini AI, Ethers.js, Polygon, Uniswap V3, Supabase

Token Plus NFT Launcher - Base Blockchain (Project)

Built a full-featured dApp to create and deploy NFTs and tokens with a drawing board, customizable token parameters, and Web3 wallet integration.

Tech: React, Solidity, Web3.js, Base Chain, ERC-20/721, MetaMask

Urbania Donation Website - Hackathon Project

Led the "Code Snipers" team to build a web platform for donations and social impact, showcasing leadership, with advanced animations and accepting crypto donations

Tech: HTML, CSS, JavaScript

AVAX Hackathon Project - Blockchain Solution

Developed a blockchain-based application for the Avalanche focusing on secure transactions, easy to interact and decentralized asset creation.

Tech: Solidity, Hardhat, React, Web3.js, Smart Contracts

BNB Hackathon Project - Multi-functional dApp

Created a multi-purpose Web3 platform for the Binance Hackathon, integrating token creation, NFT minting, wallet management, and smooth blockchain interactions.

Tech: React, Solidity, Web3.js, BNB Smart Chain, MetaMask

Fitness Club Website - Frontend & Full-Stack Project

Developed a responsive and interactive fitness club website featuring class schedules, trainer profiles, and membership management. Demonstrates strong front-end design and full-stack integration skills.

Tech: HTML5, CSS3, JavaScript, Python

Education

Vidyalankar Polytechnic	>	2023-Present
Sharda Mandir Secondary High School	>	2016-2023
New Activity Primary school	>	2013-2016
